Setup DVWA

Instructions

About

Database Setup

Click on the 'Create / Reset Database' button below to create or reset your database.
If you get an error make sure you have the correct user credentials in: `/var/www/html/DVWA/config/inc.config.inc.php`

If the database already exists, **it will be cleared and the data will be reset.**
You can also use this to reset the administrator credentials ("**admin** // **password**") at any stage.

Setup Check

Web Server SERVER_NAME: **127.0.0.1**

Operating system: ***nix**

PHP version: **8.2.10**
PHP function display_errors: **Disabled**
PHP function display_startup_errors: **Disabled**
PHP function allow_url_include: **Enabled**
PHP function allow_url_fopen: **Enabled**
PHP module gd: **Missing - Only an issue if you want to play with captchas**
PHP module mysql: **Installed**
PHP module pdo_mysql: **Installed**

Backend database: **MySQL/MariaDB**
Database username: **kali**
Database password: *********
Database database: **dvwa**
Database host: **127.0.0.1**
Database port: **3306**

reCAPTCHA key: **Missing**

Writable folder `/var/www/html/DVWA/hackable/uploads/`: **Yes**
Writable folder `/var/www/html/DVWA/config`: **Yes**

Status in red, indicate there will be an issue when trying to complete some modules.

If you see disabled on either `allow_url_fopen` or `allow_url_include`, set the following in your `php.ini` file and restart Apache.

```
allow_url_fopen = On
allow_url_include = On
```

These are only required for the file inclusion labs so unless you want to play with those, you can ignore them.
